

Board Pricing August 2022

Pricing is subject to change, please check before you proceed.

I have some **unpopulated** boards for the 6E5/6U5 replacement or the 6T5 replacement. These are two-layer boards with solder mask, silk screen, and plated through holes. The LED boards are entirely surface mount technology, and the driver boards are entirely thru-hole technology.

I'll sell you 2 sets of boards (that is two driver boards plus two LED boards, 4 boards in total) for (price includes postage):

\$12 (Canadian Dollars) for Canadian Addresses

\$11 (US Dollars) for American Addresses

€12 (Euro) for European Addresses

\$16 (Canadian Dollars) for elsewhere.

Payment

Canadian customers: I prefer interac e-transfer to gord.rabjohn@gmail.com

Elsewhere: please use PayPal to gord@rabjohn.ca

Please specify which boards you want: 6E5/6U5 (the usual fan shape pattern) or 6T5 (the less common dilating pupil pattern). Note that these are bare boards, you will need to procure the parts to populate them, and assemble them yourself. The driver boards are easy, but the LED boards will take some time and concentration. Fortunately, no component is too difficult to source.

The boards will be sent by standard mail from Canada, so please allow sufficient time.

6T5 boards (left) and 6E5/6U5 boards (right)
